

Field Service Engineer Internship

On-site · ICT Services Technical Division

Athens, Attica, Greece

OVERVIEW

APPLICATION

Description

If you are a university student looking to start your professional career, then keep on reading, you are in the right place! 🥳

At Uni Systems, we value our people, our clients and our communities and we never stop giving back to them. Young talents have been in the center of our attention for many years and we have been supporting them in every way possible.

We are continuously growing and looking for talented young professionals to join our UniQue Teams; always making room for internships in Engineering, Software Engineering, Software Testing, Data Science, DevOps, Field Service, Business Analysis and Finance.

Our interns have our support from day one and we share with them our culture and experience, as well as plenty of on-the-job training, real tasks and responsibilities, to help them grow! 📈

What does a short internship with us mean for you?

It's simple! You will have the opportunity to:

- 👉 Develop your professional skills
- 👉 Be yourself, in an open environment, filled with inspiration
- 👉 Gain hands-on experience on the field of your studies
- 👉 See first-hand what a fast-paced company in technology looks like
- 👉 Work on projects all around Europe
- 👉 Explore innovation initiatives and opportunities

Internship as Field Service Engineer

Mission

Provide on-site technical service and support in case of problems/malfunctions and proactively with the aim to provide excellent client service and added value services.

Responsibilities

- Diagnose and troubleshoot allocated problems
- Provide on-site technical support
- Pick and receive spare parts that are required for the resolution of the problem, in close collaboration with the Help Desk Engineers and the warehouse
- Responsible for the return of the spare parts/materials, that were not used or are out of order, to the warehouse
- Check the spare parts to be used in the resolution of the problem
- Maintain and check that the vehicles are in good condition
- Collaborate with teams for other company projects
- Inform back office
- Build trust with clients, communicate special requirements, and inform the team regarding any variances in terms of contract

Prerequisites

- University/College student in Computer Science, Information Technology or a relevant field
- Good knowledge of English language (written and verbal)
- Driving license A/B' category

Apply today to join us and #BeUniQue! 🕶️
